THRIVE

HEALTH SCREENS

Comprehensive packages preselected by our clinical experts, offering a broad overview of health, suitable as a wellness MOT or as the foundation for further investigation.

Lipids & HbA1c £65

Basic diabetic and cardiovascular risk screen.

Basic Screen £75

Establishes your overall baseline health.

Acute Med 1 £95

Essential chemistry across major systems.

Acute Med 2 £125

Extended chemistry with iron and inflammation markers.

Long Covid Screen £195

Advanced inflammatory and post-viral assessment.

Standard Screen £145

Broad screen including ferritin and Vitamin D.

Anaemia Profile £145

Assessment of iron status and contributing causes of anaemia.

THRYVE

Lifestyle Screen £155

Clinical chemistry with metabolic and nutritional markers.

Standard Screen Plus £175

Extended wellness screen including thyroid and tumour markers.

Fertility Panel £175

Core fertility and hormonal assessment.

Tired All The Time £195

Fatigue-focused screen including nutrition and thyroid markers.

Advanced GP2 Health Screen £245

Detailed profile with extended cardiovascular and metabolic markers.

Sports Performance £325

Nutrition, hormones, stress and recovery markers for athletic optimisation.

Nutritional Health £295

Curated nutrition, digestion and metabolic assessment.

Advanced GP3 Health Screen £395

Our most comprehensive wellness screen with extensive biomarker analysis.

THRYVE Signature Longevity Assessment £895

Executive-level preventative health screening with advanced interpretation and optimisation planning.

INDIVIDUAL BIOMARKERS

Single biomarkers and add-on investigations available alongside any panel or as standalone tests where clinically indicated.

Every test includes phlebotomy, laboratory analysis within Randox UKAS-accredited laboratories, and your detailed results report.

Where appropriate, clinician-led interpretation consultations are available to support a more personalised and structured understanding of your results.

Additional specialist biomarkers and extended diagnostics are available upon clinical request.

SAFETY & GOVERNANCE

All diagnostic testing and health screening at THRYVE is delivered within
a clinically governed and quality-assured framework in partnership with
Randox Laboratories.

All investigations are clinically selected and interpreted within the
context of your individual health profile

Not all tests will be appropriate or necessary for every patient
Results should always be reviewed alongside medical history, symptoms,
lifestyle factors and clinical findings

Where appropriate, follow-up consultations and further investigations
may be recommended to ensure safe, accurate and meaningful
interpretation

We do not promote unnecessary testing or self-directed diagnosis.
Our approach prioritises clinical integrity, evidence-based medicine,
preventative healthcare and personalised patient care.
